

Snippets

Snippets are a type of reusable content that insert predefined content into a page while editing. The snippet content is then edited in the WYSIWYG editor without affecting the original snippet file. Snippets are often used for pieces of content with specific formatting, such as tables, buttons, and displaying quotes or images. Using snippets for design elements ensures consistent styling across pages and is specific to your website design. For information about your specific snippets, refer to your developer notes or contact your school's web content administrator.

Button Grid Container

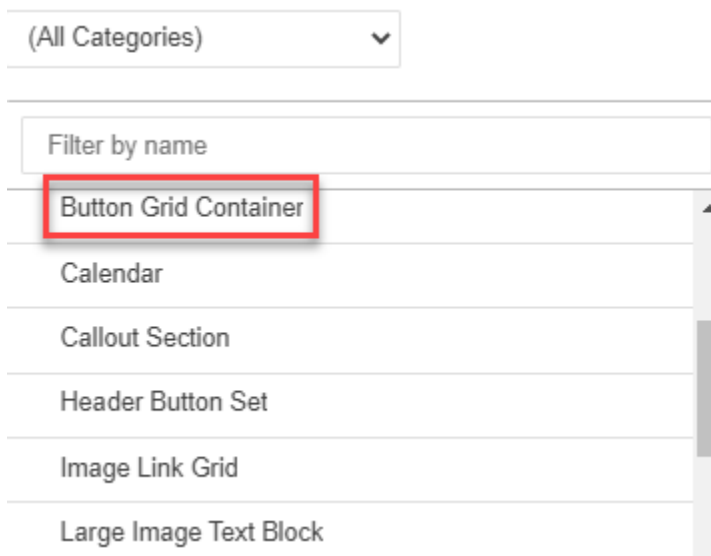

1. Login to the page to edit
2. Click **Edit**

3. Click one of the green edit buttons

4. Click the **Snippet** icon 
5. Select **Button Grid Container**
